Introduction

A build-out analysis shows the maximum planned future development within a locality. Such an analysis does not show the ideal or preferred conditions. It provides an assessment of the current zoning districts, long-range land use of undeveloped lots, and potential redevelopment areas. The resulting charts, numeric data, and graphics depict how Prince William County is changing.

The County's geographic information system (GIS) has been used to create layers and tables to monitor different types of development, within the County, at a parcel or project level. Using GIS, the Planning Office can track areas that are developed, developing, or undevelopable such as conserved or protected lands, publicly owned lands, parks, cultural resources, etc. These layers are compared to determine remaining and future growth capacity.

This build-out analysis is prepared annually by the Planning Office. Each update is based on occupancy permits, rezonings, special-use permits, and comprehensive plan amendments that have been issued or approved during the year. The data provided in this report shows the quantity of residential units built and an approximation of units yet to be built, commonly referred to as the "pipeline". Non-residential development is similarly analyzed based on building floor area. This report also includes estimates of residential and non-residential capacity in small area plans and revitalization areas. The existing density or intensity in these areas is less than currently allowed.

Supplemental sections provide information regarding parks and existing land use. Parkland acreage generally increases each year as new land is acquired. Also included is a listing and map of current land uses in the County by category.

Quick Facts!

For purposes of the build-out analysis the County is divided into component areas.

Introduction

Component Areas

The primary component areas of the Build-Out Analysis are the developed area, undeveloped area, sector plans, residential inventory, non-residential inventory, small area plans, revitalization areas, and the rural area. These areas do not include cities, towns, or large water bodies within the County. The Component Areas Map (page 14) provides a graphic of these areas within the County. The geographic sizes and locations of these areas change as land development projects evolve. As land changes from being undeveloped to zoned and finally developed, it moves through these categories. Some older developed areas of the County are planned for revitalization.

Developed Area

The developed area contains both residential and non-residential projects that have reached completion with no additional land area available for development. Public facilities, religious institutions, cemeteries, and other similar features that may or may not be fully developed are assumed to be built to their full potential in this area.

Undeveloped Area

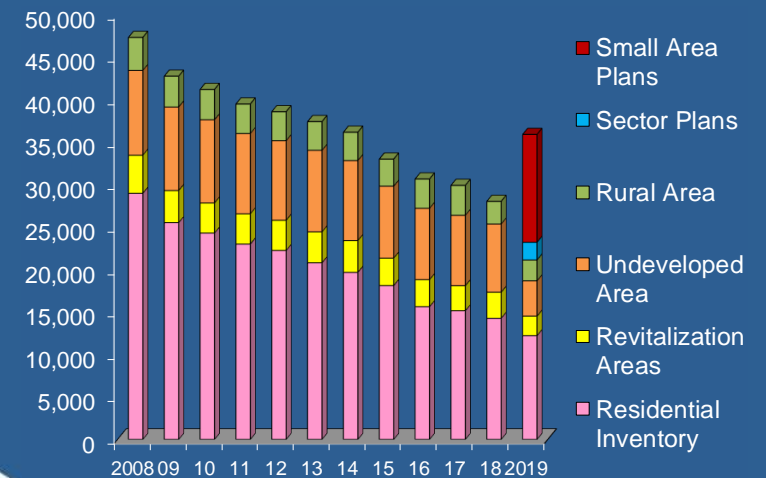

The undeveloped area is A-1 zoned land that is not in the rural area and has not been developed. Some larger tracts of undeveloped R-4 and B-1 zoned lands designated in 1958 when zoning was established in the County and currently planned for a different use are included. This analysis assumes that these areas will be rezoned to a higher intensity use in accordance with the *Comprehensive Plan*. For calculating potential development, the *Comprehensive Plan*'s long-range land use designation was used. These designations offer a high and low range for residential development and a high and average range for non-residential development. An approximate mid-range was used for residential calculations and the average was used for non-residential calculations. Small area plans have transferred some of these lands into the Small Area Plan component area of this report.

Development Area Residential and Non-Residential Inventories

These areas contain projects that have rezoning approval by the Board of County Supervisors. The projects can be in any phase of development. Some projects may be in the middle of the construction process, some may just contain a pad site that is undeveloped,

Quick Facts!

Residential build-out capacity by component since 2008.

Introduction

while others may be a project in which no development has started. Tables 10 and 13 give a breakdown by individual project in these areas.

Sector Plans

Sector Plans are a concentrated planning effort to identify strengths, weaknesses, and opportunities, build coalitions between individual residential and business communities, and set the stage for the future of that portion of Prince William County. For this report, the land areas of Innovation, 1-66/Route 29, and the Government Center were analyzed. These plans provide guidance for the establishment of commercial and residential uses within proposed mixed-use communities.

Small Area Plans

The Prince William Board of County Supervisors has initiated an update to the County's Comprehensive Plan, which includes the creation of small area plans to direct growth to key locations throughout the County. A small area plan defines a discrete geographical area and presents a unique vision and character – a sense of place. These are implemented by detailed land use plans, mobility plans, proposed economic development, and parks recreation and tourism action strategies that fulfill the vision and character.

Revitalization Areas

The revitalization areas are focused on three areas within the County identified for redevelopment. Woodbridge, Triangle, and Yorkshire are older commercial corridors that are not utilized to their full potential in their current zoning district or their long-range land use classification. Some larger tracts of undeveloped R-4 and B-1 zoned lands designated in 1958 when zoning was established in the County and currently planned for a different use were also added. This analysis assumes that these areas will be rezoned to a higher intensity use in accordance with the *Comprehensive Plan*. For calculating potential development, the *Comprehensive Plan's* long-range land use classification was used. These classifications offer a high and low range for residential development and a high and average range for non-residential development. An approximate mid-range was used for residential calculations and an averaged floor area ratio (FAR) was used for non-residential calculations.

The North Woodbridge Small Area Plan transferred land from the revitalization area into the Small Area Plan component of this report. VDOT is concluding the Route 1 widening project resulting in right-of-way acquisitions that potentially leave remnant parcels for future redevelopment. This, in some instances, provides a newly cleared lot that may receive denser development when redeveloped. This continues to shift some of the potential build-out numbers in their prospective long-range land use categories. Additionally, some areas identified as redevelopable have been removed from this analysis when property owners have substantially renovated or redeveloped their property.

Introduction

Rural Developed or Preserved Area

The rural area encompasses more than 50 percent of the County. This area contains large lot residential land tracts, parks, agricultural and forestal land, along with numerous small businesses. Manassas National Battlefield Park and Prince William Forest Park are in this area. These parks are included in the total acreage but not used for calculations as no development will occur in these areas. Marine Corps Base Quantico is also in the rural area, which includes large-scale residential and non-residential uses, but is not included in the report as it is not subject to County zoning. The base comprises approximately 22,763 acres representing 19 percent of the rural area or 10 percent of the County total. The current long-range land use and A-1 zoning district of the rural area allows only potential residential calculations based on lot size. Non-residential uses are allowed within the rural area, but there is no process by which to determine future growth potential.

Rural Undeveloped Area

This area contains buildable lots less than 20 acres with no residential dwelling. It also contains larger parcels that may or may not contain a residential dwelling and calculates how many additional lots could be created through 10-acre lot subdivision. It does not account for family subdivisions which typically create smaller legal lots.

Rural Area Residential Inventory

This area contains projects that have rezoning approval by the Board of County Supervisors and numerous by-right subdivisions that have been filed and accepted. These projects can be in any phase of development. Some projects may simply have a subdivision plan filed while others could be in the middle of the construction process. The remainder may be approved projects where no development has started. Table 11 gives a breakdown by individual projects of this area.

Introduction

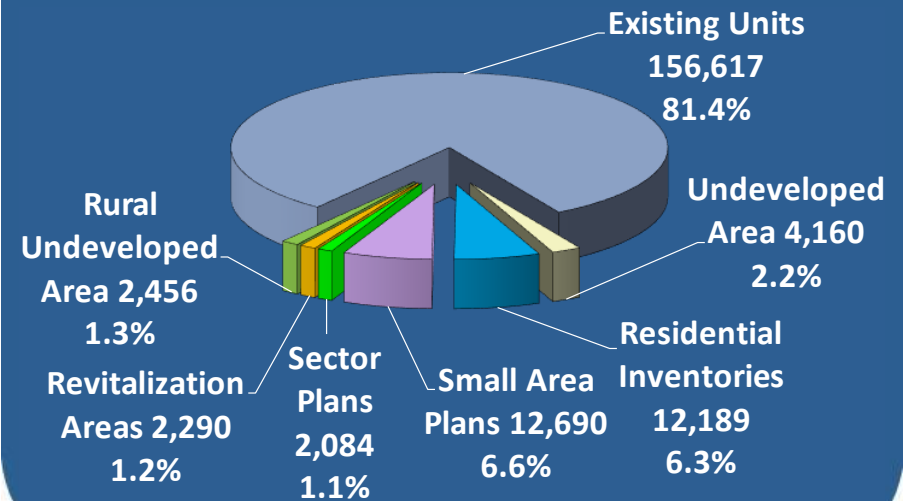

Executive Summary

The Build-Out Analysis shows that Prince William County has capacity for 35,869 additional residential dwelling units as shown in Table 1 (page 7). Adding this to the 156,617 units that existed as of December 2019 brings the residential build-out to 192,486 units. There is also a potential for 85.3 million non-residential square feet of gross floor area to be built. Adding this to the 94.4 million square feet of gross floor area already built brings the total to 179.7 million non-residential square feet, as shown in Table 2 (page 7). The information generated for the Build-Out Analysis helps to provide the data and methodology used by staff to arrive at these conclusions.

Quick Facts!

The Residential Build-Out Analysis shows a capacity of 192,486 units.

Total	179.7	

Build-Out Analysis

Undeveloped Area Analysis

An analysis of approximately 5,673 acres (Table 15 – page 40) of undeveloped land within the development area shows that 4,160 additional residential units could be built if this land was zoned consistently with the *Comprehensive Plan*, using the mid-point density range (Table 3). This area also holds the potential for 10 million square feet of non-residential gross floor area (Table 4). In addition to potential growth, this area currently contains 200 existing residential units and 12,954 non-residential square feet of gross floor area. For the 2019 analysis, some portions of the previous land areas have been moved into the Small Area Plan and Sector Plan sections.

Table Legend Notes:

*SRR also includes 747 acres of ER that is in the SRR parcels.

¹ See List of Abbreviations (page 49) and the *Comprehensive Plan's* Long-Range Land Use chapter for explanation of land uses.

² See Table 15 – page 40.

Build-Out Analysis

Sector Plan Analysis

An analysis of approximately 925 acres (Table 17 – page 41) of undeveloped land within the sector plan areas shows that 2,084 additional residential units could be built if this land was zoned consistently with the *Comprehensive Plan*, using the mid-point density range (Table 5). This area also holds the potential for 4.8 million square feet of non-residential gross floor area (Table 6). In addition to potential growth, this area currently contains 38 existing residential units and 12,954 non-residential square feet of gross floor area. The Innovation sector plan contains a town center designation that could produce an additional 400 - 1,100 multi-family dwelling units and is included in the table.

Table 5 Residential Development Area Sector Plan Acreage Analysis					
Residential Housing Units available for each Land Use Classification as of 12/31/2019					
Land Use Classification ¹	Undeveloped A-1 Acreage	Density	Potential Total Units (Minimum)	Potential Total Units (Maximum)	Potential Total Units (Midpoint)

Build-Out Analysis

Residential Inventory Analysis

An analysis of the approximately 16,240 remaining acres of land already zoned for residential or mixed-use development, but partially developed or undeveloped within the development and rural areas, shows that there are approximately 12,189 residential units yet to be built (Tables 10 and 11 – pages 15 through 25). The tables provide an indication of active zoning cases. These are cases where some type of development has been occurring in the last two years. While residential inventory land is removed when projects are completed, rezonings and proffer amendments added 354 additional acres and 512 new residential units to the total in 2019 (Table 12 – page 26). The rural area also had additional new and old subdivisions added to the inventory to better track the rural area land.

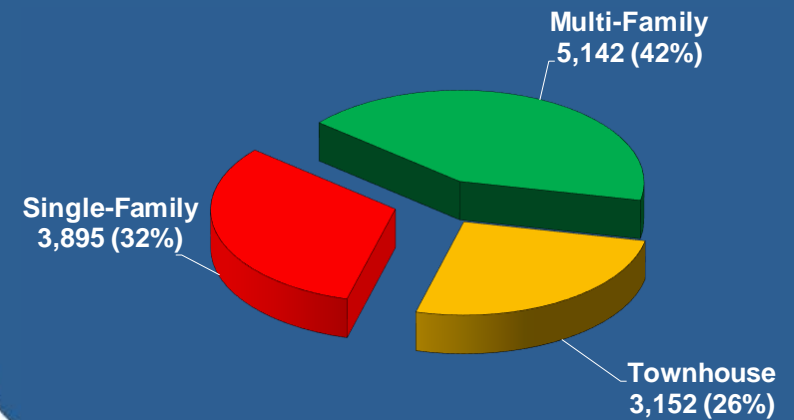

Quick Facts!

Non-Residential Inventory by zoning districts in millions of GFA.

Quick Facts!

Residential Inventory by unit types.

Non-Residential Inventory Analysis

An analysis of the approximately 5,565 acres of land in the development and rural areas already zoned for non-residential or mixed-use development, but undeveloped or partially developed, shows that there is at least 58.8 million square feet of gross floor area of non-residential development zoned and unbuilt (Table 13 – pages 27 through 37). Rezoning and special use permits added 700 acres and 13,774,246 square feet gross floor area to the total in 2019. (Table 14 – page 38 and 39).

Build-Out Analysis

Small Area Plan Analysis

This is an analysis of three approved small area plans. These plans cover 5,047 acres in their entirety. They include: North Woodbridge, The Landing at Prince William, and Dale City. Small area plans include land that is already developed to its potential, already planned but unbuilt land, and vacant or under-developed land that has been planned to a high-density. The table only analyzes vacant and under-developed land areas within these plans. This land currently covers 1,158 acres. The table below summarizes the acreage of these areas, and a potential yield of residential units and non-residential building gross floor area (GFA). A potential average residential total was provided for each unit type. As such, a higher or lower unit quantity could be built. For detailed information regarding any small area plan, please read the approved plan available online.

Table 7 Potential Remaining Development Within Small Area Plans							
Development and redevelopment potential for remaining land area as of 12/31/2019							
Small Area Plan	Acreage	Potential Single-Family Detached Units	Potential Single-Family Attached Units	Potential Multi-Family Attached Units	Potential Residential Unit Totals	Potential Average Non-Residential Gross Floor Area (Sq Ft)	Potential Maximum Non-Residential Gross Floor Area (Sq Ft)
Dale City	468	425	201	2,886	3,512	4,500,120	8,613,692
The Landing	319	126	42	1,560	1,728	3,190,903	4,458,340
North Woodbridge	371	0	0	7,450	7,450	2,366,011	3,094,951
	1,158	551	243	11,896	12,690	10,057,034	16,166,983

Build-Out Analysis

Revitalization Areas Analysis

This is an analysis of 1,185 acres (Table 16 – page 40) of land in the development area that is zoned non-agricultural but has redevelopment potential for residential, non-residential, and public uses. This area also contains 142 acres designated ER¹. The three revitalization areas currently contain 1,652 existing housing units. Using the current long-range land use classification of each area taking into account the existing 1,652 housing units, these areas could yield an additional 2,290 housing units (Table 8). This area also has the potential for an additional 1,592,761 square feet of non-residential development (Table 9). Currently this area contains 491,023 square feet of non-residential gross floor area to be developed.

Table Legend Notes:

¹ See List of Abbreviations (page 49) and the *Comprehensive Plan's* Long-Range Land Use chapter for explanation of land uses.

² See Table 15 – page 40

Build-Out Analysis

Developed Area Analysis

This is an analysis consisting of approximately 81,607 acres of land, developed with residential and non-residential uses referred to as the developed area. This land is considered to be fully built with no additional development currently available. Generally, the calculated size of the developed area increases each year as land develops unless previously developed land becomes undeveloped or subjected to revitalization such as a small area plan. Public facilities, road right-of-ways, religious institutions, public and private permanent open space areas, protected homeowner association lands, and large established businesses are considered as developed land when reviewing this area and are included in the totals. As of December 2019, 85.2 million non-residential square feet of gross floor area has been built in this area along with 140,900 residential units. The developed area does not include the undeveloped, revitalization, residential inventory, non-residential inventory, rural areas, or small area plans.

Rural Area Analysis

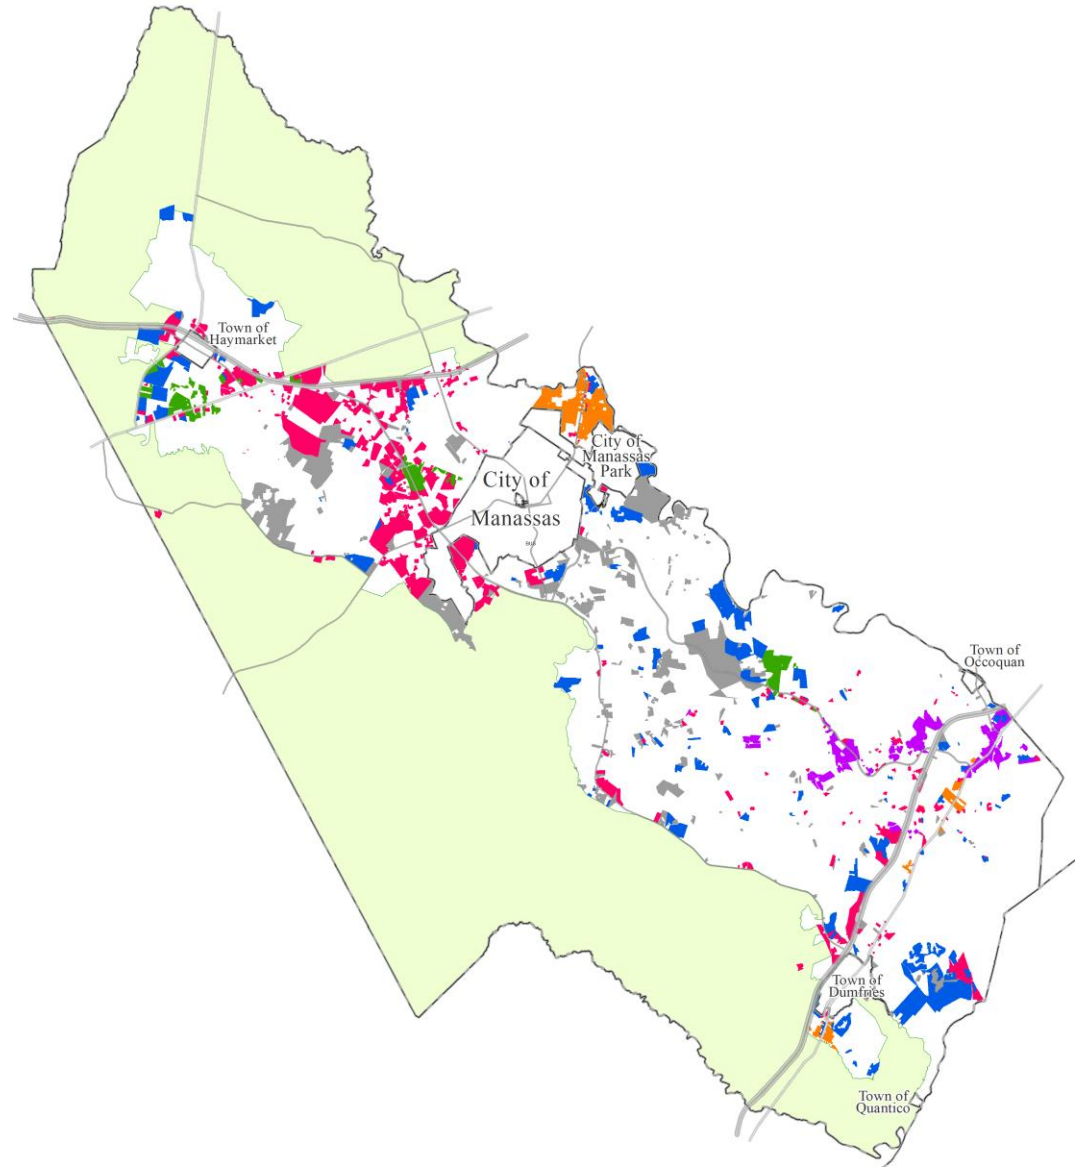

The rural developed or preserved area contains lands that have already been developed or protected. This area contains approximately 57,866 acres of land. The entire rural area contains 117,077 acres. This is approximately 54 percent of the land area in Prince William County of which approximately 22,763 acres are in Marine Corps Base Quantico. The rural area analysis does not include any residential units that might be built on Marine Corps Base Quantico. Public facilities, religious institutions, public and private permanent open space are not considered for further development. Large established businesses with substantial infrastructure investment are considered as developed land when calculating residential units. The rural undeveloped area is an analysis consisting of approximately 24,896 acres that are undeveloped or underdeveloped. This analysis shows that approximately 2,456 more residential units could be built in this area through 10-acre lot subdivision or development of vacant lots not in existing subdivisions. The rural area does contain residentially rezoned and subdivided lands that are tracked separately in the rural area residential inventory section of this report (Table 9 – page 20). An increased trend of recorded residential subdivision plats on farms and other agricultural businesses, not previously in the rural housing calculation, have been moved into the rural area residential inventory section of this report by their subdivision name. Occupancy permits indicate that, within the rural area, 105 residential units were built in 2019.

Privately owned parcels 20 acres or larger were found to have the potential for 1,744 more housing units. There are also 712 undeveloped lots available that are less than 20 acres. The rural area currently contains 7,923 existing residential units. The rural area also contains 2.2 million non-residential square feet of gross floor area. This does not include any facilities or residential units located on Marine Corps Base Quantico whose 22,763 acres are included in the total land area. The Manassas National Battlefield Park and Prince William Forest Park are among some of the other large features in this area that continue to acquire rural lands, removing them as potential residential uses.

Build-Out Analysis

Component Areas Map

Component	Acres
Developed Area	81,607
Undeveloped Area	5,673
Residential Inventory	4,690

Build-Out Analysis

Inventory of Residential Units in the Development Area Remaining to be Built as of December 31, 2019

Column descriptions:

Case Name - This column indicates the current name attached to the zoning case. A marketing or subdivision name was shown on some cases in parentheses.

Case Number - This column indicates the case number attached to the zoning case.

Zone - This column indicates the zoning district of the zoned land. Text of "AR" indicates the zoning district is Age-Restricted.

Type - This column indicates the unit type counted in the inventory, either single-family detached (SF), single-family attached (i.e., townhouse) (TH), or multi-family attached (MF). An "M" indicates that the mix of units has been estimated because the proffers allow the developer flexibility of unit type.

Approved - This column indicates the maximum number of units permitted by proffers where applicable. In cases without proffers or where the proffers did not specify the maximum, a maximum theoretical yield was calculated based on the zoning district and acreage. An "@" indicates a calculated unit total. An "!" indicates the actual number of approved units has been reduced to match the subdivision plat or remaining area and may no longer give the entire rezoning quantity.

Built - This column reflects the number of completed units based on assigned premise addresses that have been issued a certificate of occupancy.

Active - This column indicates cases that have some type of development occurring at the time of this report.

Remaining - This column indicates the difference of Approved and Built and indicates the number of units yet to be built for that rezoning case or portion of.

District - This column indicates the Magisterial District containing the Zoning Case. An "*" indicates the zoning case is in more than one district.

For additional symbol explanation, refer to the notes at the end of the table.

active cases total ⁸ **7,471**

Notes:

1. Case Names ending in "- BOCS" are from the original 1958 BOCS rezonings or later BOCS initiated and approved rezonings. In these instances, the subdivision or owner name is the Case Name.
2. Zoning Districts marked with "AR" contain Age-Restricted housing.
3. Unit types marked with an "M" indicate that the mix of units has been estimated as the proffers allow the developer flexibility of unit type.
4. Unless otherwise noted, approved units are based on recorded proffers. Cases marked with a "¶" have monetary proffers. Cases marked with an @ are not proffered and the approved number of units is a theoretical yield considering allowed lot size and buildable area. Approved units marked with an exclamation point (!) indicates the actual number of approved units have been reduced to match the subdivision plat or remaining area and no longer gives the entire rezoning quantity.
5. Built units are based on 12/31/2019 GIS Premise Address database using occupancy permits issued.
6. Cases marked with an asterisk (*) overlap into an adjoining District. The District name indicated contained more of the project area in these instances.
7. This total represents the total of the residential inventory in the development area and does not include units in the rural area.
8. This total represents the total number of units that are potentially going to be completed in the near future as these cases are actively being developed.

Residential Inventory

Inventory of Units in the Rural Area Residential Rezoning Remaining to be Built as of December 31, 2019

Column descriptions:

Case Name - This column indicates the current name attached to the zoning case. A marketing name was shown on some cases in parentheses.

Case Number - This column indicates the case number attached to the zoning case.

Zone - This column indicates the zoning district or districts of the zoned land.

Type - This column indicates the unit type counted in the inventory, either single-family detached (SF), single-family attached (i.e., townhouse) (TH), or multi-family (MF).

Approved - This column indicates the maximum number of units permitted by proffers where applicable. In cases without proffers or where the proffers did not specify the maximum, a maximum theoretical yield was calculated based on the zoning district and acreage. An "@" indicates a calculated unit total. An "!" indicates the actual number of approved units has been reduced to match the subdivision plat or remaining area and no longer gives the entire rezoning quantity.

Built - This column reflects the number of completed units based on assigned premise addresses that have been issued a certificate of occupancy.

Active - This column indicates cases that have some type of development occurring at the time of this report.

Remaining - This column indicates the difference of Approved & Built and represents the number of units yet to be built for that rezoning case or portion of.

District - This column indicates the Magisterial District containing the Zoning Case. An "*" indicates the zoning case is in more than one district.

For additional symbol explanation, refer to the notes at the end of the table.

total ⁴ 1,328

active case units ⁵ 252

Notes:

1. Unless otherwise noted, approved units are based on recorded proffers. Cases marked with a "!" have monetary proffers. Cases marked with an @ are not proffered and the approved number of units is a theoretical yield considering allowed lot size and buildable area. Approved units marked with an exclamation point (!) indicate the actual number of approved units has been determined by a subdivision plat, or remaining area, and may no longer give the entire rezoning or subdivision quantity.
2. Built units are based on 12/31/2019 GIS Premise Address database using occupancy permits issued.
3. Case Names ending in "- BOCS" are from the original 1958 Board of County Supervisors rezonings or later BOCS initiated and approved rezonings. In these instances, the subdivision name is the Case Name.
4. This total represents the total units yet to be built in this report.
5. This total represents the number of units that will potentially be completed in the near future, as these cases are actively being developed.

Residential Inventory

Rezoning Approved by the Board of County Supervisors that Created Additional Residential Units in 2019

Total Acres		354.34	128	175	209	512 Total Units		

Column descriptions:

Case Number - This column indicates the case number attached to the zoning case.

Case Name - This column indicates the current name attached to the zoning case.

Acreage - This column indicates the amount of rezoned land area in acres.

Single Family Units - This column indicates the approved quantity of detached single-family dwelling units.

Townhouse Units - This column indicates the approved quantity of attached single-family dwelling units.

Multi-Family Units - This column indicates the approved quantity of attached multi-family dwelling units.

Unit Total - This column indicates the sum of dwelling units in the three categories.

Approval Date - This column represents the date the rezoning was approved by the Board of County Supervisors.

Non-Residential Inventory

Inventory of Non-Residential Rezoning Remaining to be Built as of December 31, 2019

Column descriptions:

Case Name - This column indicates the current name attached to the zoning case. Cases with "(SUP)" at the end of the name are special use permits. A marketing name was shown on some cases in parentheses also.

Case Number - This column indicates the case number attached to the zoning or special use permit case.

Zone - This column indicates the zoning district of the zoned land.

Remaining Acreage - This column indicates the acreage that is still available to be built upon. This can represent the entire or a partial amount of the zoning or special use permit case.

Remaining Square Feet - This column indicates the potential amount of non-residential square feet that remains to be built of the indicated portion of the zoning or special use permit case.

District - This column indicates the Magisterial District containing the zoning or special use permit case. An "*" indicates the case is in more than one district.

For additional symbol explanation, refer to the notes at the end of the table.

Notes:

1. Case Names ending in "-BOCS" are from the original 1958 BOCS rezonings or later Board of County Supervisors initiated and approved rezonings. In these instances, the subdivision or project name is the Case Name. Cases with "(SUP)" at the end of the name are special use permits.
2. The remaining acreage was determined to be the land available to be developed or the entire zoned area dependent on the zoning case. In some instances, this acreage may reflect only a small amount of the original rezoning or special use permit case. The acreage indicated was calculated by using the County's GIS software.
3. The remaining building area was calculated by several different methods. Most zoning cases (primarily older) were calculated by using modified FAR values. These values were adjusted to reflect current trends in development. Other cases use the proffered or conditioned building area amounts, or specific proffered or conditioned FAR values.
4. Cases marked with an asterisk (*) overlap into an adjoining District. The District name indicated contained more of the project area in these instances.
5. Dale City RPC undeveloped land was calculated using the FAR of the B-1 zoning district. Dale City consists of multiple zoning cases to include portions of: REZ1968-0001, REZ1969-0018, REZ1975-0014, REZ1999-0017, and REZ1999-0039.
6. The total is not the absolute total acreage to be built upon for non-residential purposes. This total represents the total acreage listed in this report containing only major zoning and special use permit cases with structures yet to be built. Many older by-right parcels were not projected.
7. The total is not the absolute non-residential building area to be built for non-residential purposes. This total represents the square feet listed in this report containing only major zoning and special use permit cases with structures yet to be built. Many older by-right parcels were not projected.

Non-Residential Inventory

Rezoning and Special Use Permits Approved by the Board of County Supervisors for Non-Residential Development that Created Additional Non-Residential GFA

1/1/2019 through 12/31/2019

Column descriptions:

Case Number - This column indicates the case number attached to the planning case.

Case Name - This column indicates the current name attached to the planning case.

Acreage - This column indicates the amount of non-residential land area in acres.

Zone - This column indicates the zoning district of the zoned land.

Total Sq Ft - This column indicates the total gross floor area (GFA) approved by the Board of County Supervisors.

Application Type - This column indicates the planning case type, i.e. rezoning (REZ), proffer amendment (PRA), or special use permit (SUP).

Approval Date - This column represents the date the case was approved by the Board.

District - This column indicates the Magisterial District containing the zoning or special use permit case.

Undeveloped Area by Long-Range Land Use

The development potential of undeveloped A-1 lands within the development area shown in Tables 3 and 4 (page 8) is calculated from the values in Table 17. Some long-range land use classifications (CEC, RCC, and REC) are used in both residential and non-residential calculations as they offer a mix of potential development. A portion of the ER (793 acres) that falls within the SRR classified parcels was added to the SRR acreage during the calculation process to obtain the 3,716 acres on Table 3 (page 8) as the density calculation may include the ER area of the project in this land use classification. The average FAR was used for calculations to determine mid-range or average totals.

Sector Plan Areas by Long-Range Land Use

The development potential of underdeveloped lands within the sector plan areas shown in Tables 5 and 6 (page 9) is calculated from the values in Table 18. Some long-range land use classifications (CEC and REC) are used in both residential and non-residential calculations as they offer a mix of potential development. A portion of the ER (21 acres) that falls within the SRR classified parcels was added to the SRR acreage during the calculation process to obtain the 208 acres on Table 5 (page 9) as the density calculation may include the ER area of the project in this land use classification. The average FAR was also used for calculations to determine mid-range or average totals.

Revitalization Areas by Long-Range Land Use

The development potential of underdeveloped lands within the revitalization areas shown in Tables 8 and 9 (page 12) is calculated from the values in Table 19. Some long-range land use classifications (CEC, UMU, and VMU) are used in both residential and non-residential calculations as they offer a mix of potential development. The average FAR was also used for calculations to determine mid -range or average totals.

Small Area Plan Land Use Changes

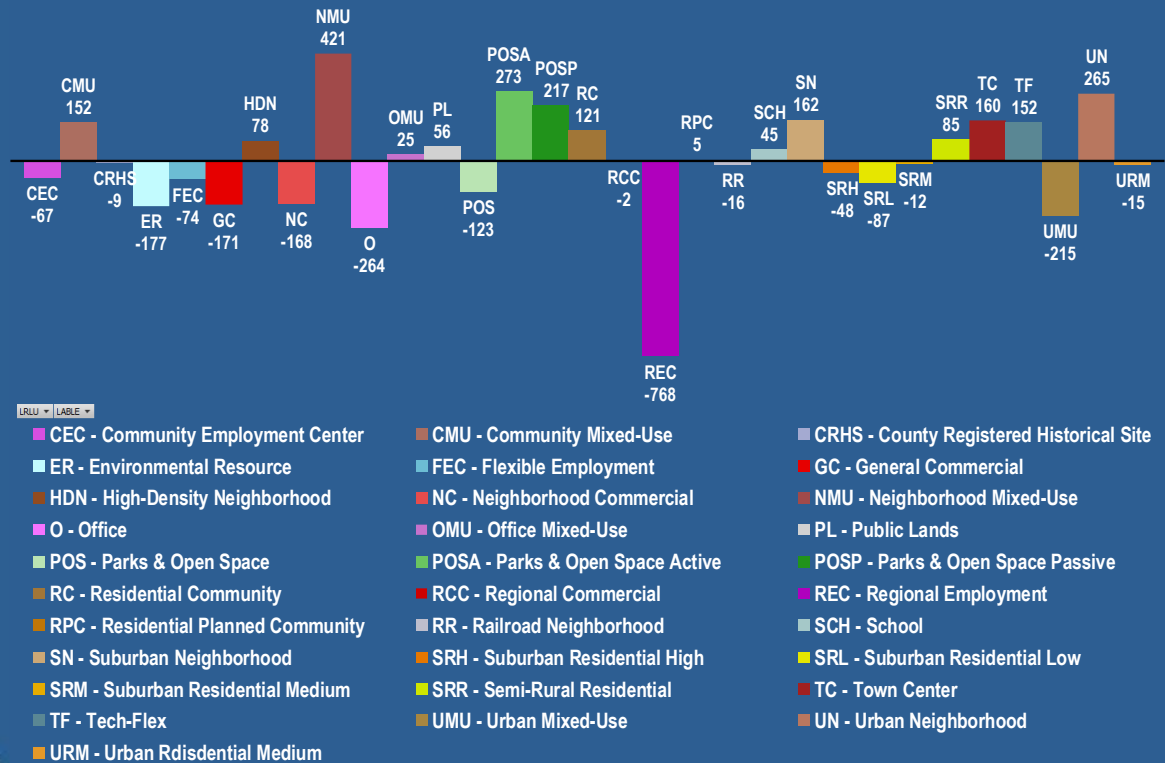

Small Area Plan Long-Range Land Use changes

The creation of the North Woodbridge, The Landing at Prince William, and Dale City small area plans have created additional long-range land use designations. To achieve the desired density, some portions of land were redesignated to a new or different long-range land use. The bar chart shows the changes in acreage of each changed land use. Lands below the black line indicate acreages removed from a given land use, while the lands above the black line indicate acreages added into land designations.

Quick Facts!

Small Area Plan Long-Range Land Use Changes by Classification.

Parkland Inventory

Parks

Parkland is distributed throughout all areas of the County. For calculations within this report, parks and open space lands are generally interpreted as developed land. New development often brings new parkland through subdivision or proffers. Additionally, new parkland is acquired, conservation easements are recorded, and historical and cultural resources are protected. The County goal, established in the *Parks, Recreation and Tourism* chapter of the *Comprehensive Plan*, is to provide 70 acres of parkland per 1,000 people. This goal is further defined to contain 15 acres of County-owned parkland for every 1,000 people. The larger standard was created as a means of taking into account the large amount of federal and state parkland that are available in the County. The estimated total parkland is 29,376 acres.

The County's GIS was used to calculate acreage totals from the parks layer. The Department of Parks, Recreation and Tourism manages at least 80 parks totaling at least 4,611 acres. The GIS indicates that the Prince William County School Board controls approximately 885 acres of parkland. This produces a total of 5,496 County directed acres of parkland.

The estimated population for Prince William County on December 31, 2019 was 465,818 (Demographic 2019 – 4th Quarter Estimate). Thus, the County currently has 63.1 acres of parkland per 1,000 people and 11.8 acres per 1,000 people of County-owned parkland.

Quick Facts!

County managed parks are grouped into various types.

Parkland Inventory

Park Type Descriptions

Neighborhood Park

This general classification includes parks that serve neighborhoods and mixed-use centers in suburban and urban areas of the County. Neighborhood parks primarily offer a variety of active or passive recreation opportunities, or a combination of both, in close proximity to residences and employment centers. Areas designated for natural and/or cultural resource protection may also be included within these parks.

Community Park

This classification includes larger parks that serve larger geographic areas of the County and provide a variety of indoor and outdoor recreation facilities and park experiences. Portions of these parks may be designated for natural and/or cultural resource protection.

Regional Park

This classification includes larger parks that serve the County and provide a variety of larger-scale indoor or outdoor recreation facilities, or both, and facilities that are unique within the County. Areas designated for natural and/or cultural resource protection and management may also be included within these parks.

Linear and Resource-Based Park

This classification includes parks that primarily preserve, protect, and interpret natural and/or cultural resources.

Leased Park

This classification includes lands leased by the County for park use.

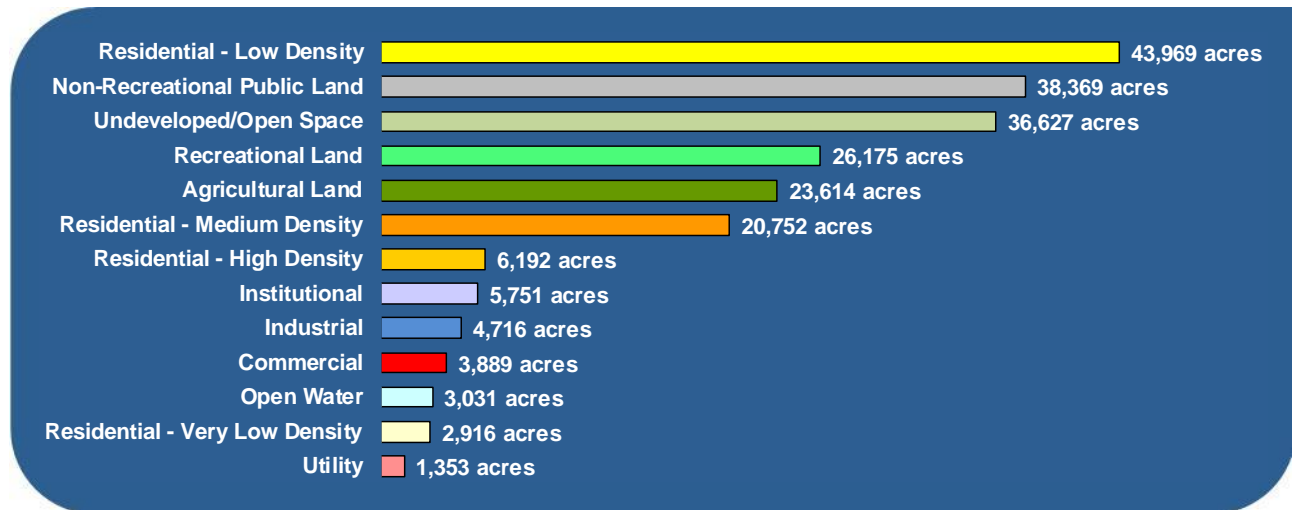

School-Community Use Park

This classification includes active and passive recreation areas of County schools. These lands are owned by the County School Board and are not counted toward the County's park total at this time although the Department of Parks & Recreation programs and maintains some of them. The overall land total is divided equally between park and open space acreage totals.

Current Land Use Analysis

Current Land Use

This is an analysis of the current land use conditions of the lands of Prince William County. These acreage totals no longer include the towns within Prince William County. Real Estate Assessment data was linked to each parcel to determine the current use or status. These categories were developed in conjunction with the Watershed Management Division of Public Works for watershed planning purposes.

Agricultural Land – Farming and livestock uses.

Commercial – Developed businesses, shopping areas, office clusters, restaurants, and hotels.

Industrial – Industrial parks, manufacturing facilities, warehousing, landfills, railroads, and quarries.

Institutional – Schools, churches, colleges, universities, cemeteries, police and fire stations, libraries, county buildings, and other public assembly facilities.

Non-Recreational Public Land – Lands owned by the state and federal government, Virginia Department of Transportation right-of-ways, and Marine Corps Base Quantico.

Undeveloped/Open Space – Undeveloped land and protected open space areas, as well as residential and non-residential parcels not yet developed.

Open Water – Large bodies of water, primarily the Potomac and Occoquan Rivers.

Current Land Use Analysis

Recreational Land – Parklands owned by Prince William County, along with state and federal parks.

Residential-High Density – Developed residential lots of less than 6,000 square feet.

Residential-Medium Density – Developed residential lots between 6,000 square feet and 1 acre.

Residential-Low Density – Developed residential lots between 1 and 20 acres.

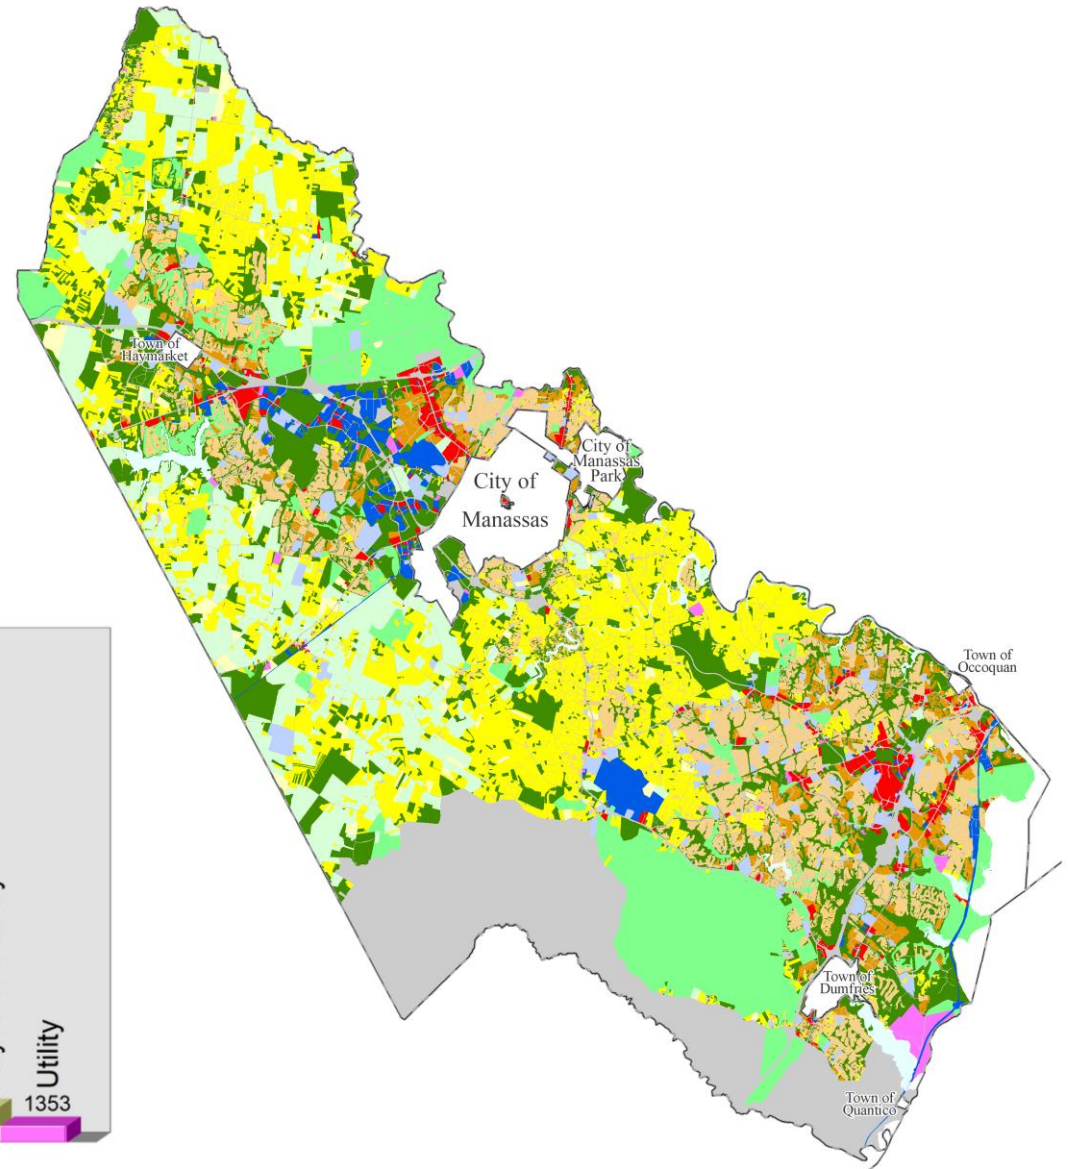

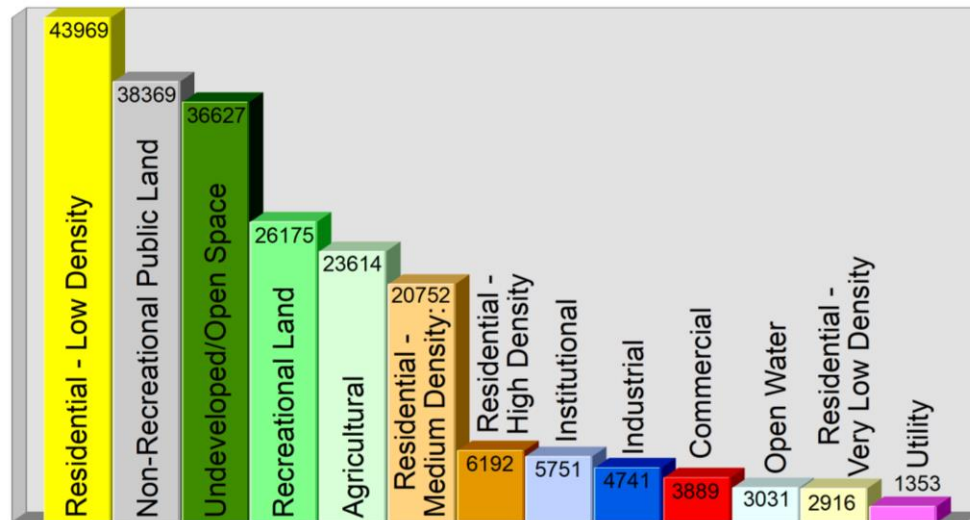

Residential-Very Low Density – Developed residential lots greater than 20 acres.

Utility – Power and pipeline rights-of-way, solid waste disposal facilities, and power plants.
